

DESICAL®

Hygiene and convenience in the coop

More hygiene for:

- Thurkeys • Broiler • Layers
- Water fowls • Special poultry

DESICAL® aktiv

The premium hygiene

Highly effective hygiene powder for professional poultry management

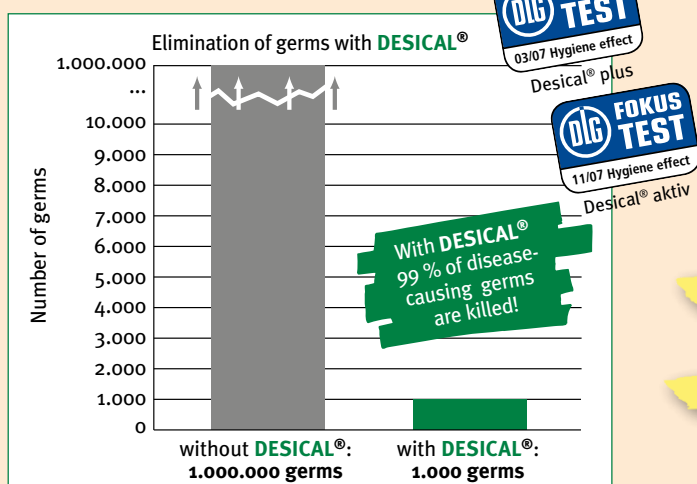

DESICAL® aktiv is an amorphous, extremely fine hygiene product based on natural, mineral active substances and raw materials. **DESICAL®** aktiv is highly alkaline and can be safely and perennially used in poultry farming even in the presence of fowl.

In poultry management, **DESICAL®** aktiv is used as a hygiene product for conservation of health in animals and fowl as it ensures a hygienic environment for the fowl.

Highly alkaline and germ-abating

DESICAL® aktiv enhances the pH value sustainably above pH 12 when used continuously; it is capable of maintaining a robust buffer against acidic influences. The germ spectrum is positively changed for long periods while achieving a significant reduction in pathogenic germs.

Proof of hygiene effect as investigated during the DLG Focus test

Source: DLG Test Centre for Technology & Resources – www.dlg-test.de

Supplied: as a dry litter in 25 kg sacks

Application: 100 g **DESICAL®** aktiv per m²

The special composition of **DESICAL®** aktiv guarantees:

- maximum suction power/high humidity bonding ability
- significant reduction of disease-causing germs
- bactericide action confirmed by the DLG Focus test
- effectively fights creeping insects like the red avian mite
- improves quality of air in the pen
- extremely fine formulation for increased productivity
- a wholly natural product

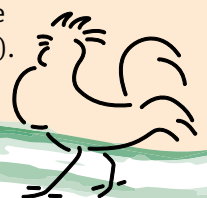

DESICAL® is an approved biocide substance in accordance to appendix II of EU 2032 N-33003 for improvement of hygiene in the veterinary sector.*

Since the recognition of **DESICAL®** as a biocide substance and the successful results obtained from the DLG Focus test “hygiene effect” users can now safely and lawfully rely on the product which no other is able to offer today.

DESICAL® aktiv does not leave residues; it is compatible with biogas installations as it remarkably improves the liquid manure’s flow-ability. **DESICAL®** active finds an entry under the list of operational resources issued by the Research Institute of Organic Agriculture (FiBL).

* Use biocides with caution. Always read the label and product details before using it.
