

# DESICAL®

*Hygiene and convenience in the coop*

## More hygiene in:

- Farrowing area
- Service centre
- Piglet raising
- Pig fattening

# DESICAL® aktiv

The premium hygiene

## Highly effective hygiene powder for professional pig management

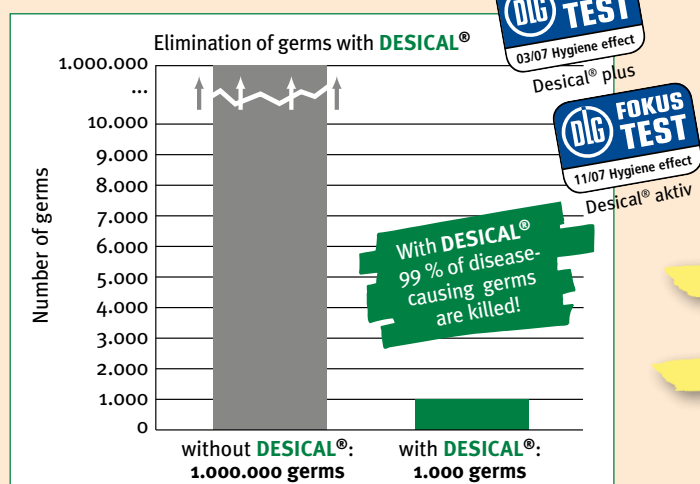

DESICAL® aktiv is an amorphous, extremely fine hygiene product based on natural, mineral active substances and raw materials. DESICAL® aktiv is highly alkaline and can be safely and perennially used in livestock husbandry even in the presence of livestock.

In pig management, DESICAL® aktiv is used as a dry litter in the fattening area, and for powdering the newborn piglets. It is especially suitable for use in fumigation blowers in the pig fattening.

## Highly alkaline and germ-abating

DESICAL® aktiv enhances the pH value sustainably above pH 12 when used continuously; it is capable of maintaining a robust buffer against acidic influences. The germ spectrum is positively changed for long periods while achieving a significant reduction in pathogenic germs.

## Proof of hygiene effect as investigated during the DLG Focus test

Source: DLG Test Centre for Technology & Resources – www.dlg-test.de

**Supplied:** as a dry litter in 25 kg sacks

**Application:** 100 g DESICAL® aktiv per m<sup>2</sup>

## The special composition of DESICAL® aktiv guarantees:

- ⇒ maximum suction power/high humidity bonding ability
- ⇒ significant reduction of disease-causing germs
- ⇒ bactericide action confirmed by the DLG Focus test
- ⇒ extremely fine formulation for increased productivity
- ⇒ a wholly natural product

DESICAL® is an approved biocide substance in accordance to appendix II of EU 2032 N-33003 for improvement of hygiene in the veterinary sector.\*

Since the recognition of DESICAL® as a biocide substance and the successful results obtained from DLG Focus test “hygiene effect” users can now safely and lawfully rely on the product which no other manufacturer is able to offer today.

DESICAL® aktiv does not leave residues; it is compatible with biogas installations as it improves the liquid manure’s flow-ability. DESICAL® active finds an entry under the list of operational resources issued by the Research Institute of Organic Agriculture (FiBL).

\* Use biocides with caution. Always read the label and product details before using it.
